1. INTRODUCTION

Zippr's Airtasker clone is the ideal solution for entrepreneurs aiming to launch an online outsourcing marketplace. This robust system connects customers with skilled professionals, automates bookings, and ensures seamless revenue generation from day one.

The clone features advanced tools like instant service booking, real-time provider tracking, and secure payments, empowering businesses to scale efficiently. These capabilities help startups compete with established marketplaces while delivering exceptional user experiences.

Designed for profitability, this ready-made platform supports diverse home services, including repairs, plumbing, electrical work, and cleaning. Its user-friendly interface and comprehensive functionality make it a turnkey solution for building a successful handyman service business.

2. USERS

Our online marketplace solution includes essential features for the following users:

- **Customers**
- **Service Providers**
- **Admin**

2.1 Customers

Customers can easily book skilled professionals via the platform. They can register with email or social accounts, pick a service, input their address, and set an appointment. The system offers live tracking of assigned pros, ETA updates, and safe payment methods. Users may also rate providers, post feedback, check past services, and reach support if required.

2.2 Service Providers

Service Providers: Manage teams of handymen under their brand. They sign up, onboard skilled workers, assign jobs, and monitor quality. Providers handle multiple requests, ensuring dependable service for customers.

Handymen: Verified professionals who register solo or join a provider. They accept jobs, manage schedules, track income, and grow their reputation through client reviews.

2.3 Admin

Admin: Oversees the platform, ensuring seamless operations for users and providers. They approve/reject handyman registrations, monitor ongoing/completed jobs, and process payments securely.

Admins configure service fees, manage promotions, and enforce safety/quality standards. They also analyze performance metrics, track engagement, and introduce upgrades to optimize the user experience.

3. KEY FEATURES FOR USERS

Discover features that improve customer service, simplify operations for handymen and providers, and give admins complete oversight to effectively run the on-demand service platform.

3.1 Customer Features

- **Quick Signup:** Sign in seamlessly via Google, Apple, or OTP for fast, secure access.
- **Simple Booking:** Explore services, compare pricing, use promo codes, and add extras. Monitor booking progress live.
- **Request Custom Jobs:** Post tailored job descriptions when predefined services don't fit your needs.
- **Instant Chat:** Message assigned handymen directly to clarify service requirements.
- **Live Location:** Track your handyman's real-time arrival status for punctual service.
- **Service Control:** Temporarily stop/resume active services or cancel when necessary.

3.2 Service Provider Features

- **Availability Toggle:** Handymen can switch between online/offline modes. Providers can manage their team's availability too.
- **Job Bidding:** Providers can place bids on customer-posted job requests.
- **Task Assignment:** Like Uber-for-handymen, providers can either self-assign jobs or delegate to other handymen.
- **Extra Charges:** Handymen/providers may add fees for additional services rendered.
- **Request Management:** Providers/handymen can accept or reject incoming service requests.
- **ID Verification:** Handymen/providers verify identity by submitting valid documents.
- **Service Proof:** Upon completion, handymen submit photo/video evidence of work done.

3.3 Admin Features

- **User Management:** Admin can oversee all users, including customers, providers, and handymen, within the On-Demand Handyman app.
- **Provider Verification:** Admin handles the full verification process for new vendors by reviewing their submitted documents.
- **Service Categories:** Admin controls service categories and subcategories to efficiently structure services in the Handyman app, similar to Uber.
- **Manage Booking:** Admin can access and review all bookings made on the on-demand service app along with their details.
- **Manage Slider:** Admin can update homepage slider images in the customer app, a key feature for running promotions.
- **Staff Administration:** Admins assign and manage user roles/permissions across the platform.

4. ADDITIONAL FEATURES

- **Remote Services:** Providers can deliver services virtually through digital channels.
- **Cancellation Fees:** Customers may incur charges when canceling booked services.
- **Map Integration:** Users access location tracking, navigation, and route optimization.
- **Service Upgrades:** Providers offer optional add-ons for personalized experiences.
- **Pre-Payment Settings:** Admins configure default deposit percentages with manual overrides.
- **Bundled Services:** Customers book multiple related services in a single package.
- **Flexible Commissions:** Providers set individual handyman payout percentages.
- **Scheduling Flexibility:** Providers define available time slots for customer selection.
- **Verified Badges:** Providers earn trust indicators through blue tick authentication.

5. GENERAL FEATURES
